## PERSONAL PROJECTS

---

### Tianac

June 2023 - Present

#### 2D Metroidvania Game

I've been developing this project for quite some time, driven by my lifelong dream of creating my own game. Since childhood, I've been passionate about game development, and I take every - opportunity in my free time to bring this vision to life. While the journey requires patience and dedication, I am committed to seeing it through completion. I understand it will take time, but I am fully invested In the creative and technical process. This project is not just a personal ambition. It's a reflection of my skills, passion and determination to build something meaningful.

### Ang Tracktos

February 2025 - Present

#### Financial Management

I focused on building my portfolio by developing a financial management application using MERN - tech stack. This project not only enhances my skill but also allows me to explore ways to improve its functionality and competitiveness within the market. Through this hands-on experience, I an refining my expertise in full-stack development while deepening my understanding of modern frameworks and best practices. My primary goal is to strengthen my portfolio and gain practical knowledge of the MERN stack, preparing me for future opportunities in software development.
